Roller Weight Loss & Advanced Surgery employs a multidisciplinary, team approach to provide patients the best bariatric medical care. Roller Weight Loss & Advanced Surgery has built a reputation of excellence nationwide. As a result, we serve patients from all over the country, with specialized treatment plans to accommodate busy schedules. We respect your time and understand that multiple appointments and travel can be tiresome and time consuming, which is why we do our very best to streamline the process without jeopardizing the quality of patient care.

**Why Choose Roller Weight Loss and Advanced Surgery?**

Roller Weight Loss & Advanced Surgery features the only group of fellowship-trained bariatric (weight loss) and advanced general laparoscopic surgeons in Arkansas. Johsua Roller, MD, Young Kwon, MD, and Josh Mourot, MD offer the most sophisticated modern weight loss surgery (bariatric) surgery techniques. The available surgeries include the laparoscopic Roux-en-Y gastric bypass, duodenal switch, sleeve gastrectomy, Orbera gastric balloon and adjustable lap gastric banding (LAP-BAND).

Kristin Roller, MD, board certified in bariatric medicine and family practice, conducts an extensive medical evaluation prior to surgery. Kristin Roller, MD will oversee all testing, consultations, and additional evaluations you may need to optimize your overall health and help you take control of your weight. This will ensure a safe journey through the surgical process. In addition, you will meet with one of our bariatric dieticians to review both pre- and post-operative nutrition plans. The bariatric medical team and structured program will help you achieve your weight loss goals.
1. Our surgeons are board-certified and fellowship trained in bariatric surgery.
2. Our three surgeons have performed more than 4,500 bariatric surgeries and have created a practice known and sought after around the country. They stay abreast of the latest clinical advancements and are extensively published. Additionally, they have lectured or taught around the states.
3. Our surgeons have surgical privileges with several local hospitals but perform most procedures at a Center of Excellence. This accreditation requires we conform to strict national standards regarding: equipment, surgeon and staff credentials and operating room safety. Few surgical facilities maintain the standards necessary for this accreditation.
4. Our practice has the capability to handle non-invasive to surgical procedures, all in the same location offering an added convenience for our patients.

Patient Education
Patient education is of the utmost importance to us. While our in-house seminars are very popular, we offer online seminars for the convenience of our patients. So if you can’t make it to one of our live seminars, it’s not a problem. You can now watch our seminar online.

The online seminar will take approximately 40 minutes to complete. We encourage you to have pen and paper handy to write down any questions you may have. You will need to have the latest version of Adobe Flash Player on your computer to allow the presentation to play and can download it for free here.

Watching this free online weight loss seminar is your first step to a new life. Our hope is that you will become more informed about weight loss surgery and your options. In order to schedule your first appointment with Roller Weight Loss & Advanced Surgery, you need to watch this online seminar, complete your New Patient Information form, and submit initial payment. Our comprehensive and experienced team is ready to help you along the way.

Click here to watch online seminar.

Virtual or In-Person Consultation
You can choose to visit us for a face-to-face consultation, or we can conduct a “virtual” consultation via telephone or online conference. During the consultation a health history will be obtained and a necessary testing list developed. Testing is tailored to each individual based on their co-morbid conditions such as heart disease, diabetes, COPD (chronic obstructive pulmonary disease), kidney disease, and history of blood clots. We will coordinate with your local primary care physician to get lab work, EKG (electrocardiogram), letter of support, weight history and any other necessary items completed prior to travel if you would like. If your insurance company requires a few months of diet and exercise prior to surgery, we will coordinate with your provider of choice in your hometown.

If your insurance does not have a diet and exercise requirement, an expedited process can be utilized. You can arrive at our state-of-the-art testing facility and have all you testing done such as cardiac stress test, sleep study, endoscopy, lab work,
EKG, pulmonary function, chest x-ray, and medical assessment done on one day and have surgery as soon as two days later.

Planning Guide
Please plan to arrive one day before your scheduled pre-operative appointment so Dr. Roller and his staff can meet with you before the surgery. Plan to stay in the Northwest Arkansas area for approximately 10-14 days after your procedure. The recovery time depends on the type of surgery you have, and how well you are healing after the procedure. However, most patients are able to travel after this 10-14 day recovery period. Please consult your patient coordinator for detailed information about your procedure, as well as instructions and special considerations for traveling before and after your procedure.

Concierge Service
Just like a great concierge at a five-star hotel, our staff will assist you in every way with your visit – whether you drive or fly to our Roller Weight Loss & Advanced Surgery facility. Northwest Arkansas has a great deal to offer from excellent international cuisine to interesting museums to designer shops and one-of-a-kind boutiques. Stay in the surgical facility overnight and then transfer to your hotel for the remainder of your stay.

We can assist you from start to finish:
- Travel arrangements, including transportation from and to the airport
- Where to stay – some hotels provide discounts.
- Where to eat
- Where to shop
- Post-operative visits
